EXECUTIVE SUMMARY

The GCF approved funding of the Zimbabwe NAP project on 11 May 2018 (Grant effectiveness date) for a period of three years ending on 10 May 2021. In recognition of the potential impact of the COVID 19 Pandemic on project implementation, the GCF approved the project extension for six months (as per DCP/2020/172.23) and the revised expiry date was 9 Nov 2021. However due to the impact of the COVID 19 global pandemic on programming in 2020, a further 13 months extension was approved by GCF on 14 December 2021 which brings the new expiry date to 30 November 2022. The first advance disbursement of USD 877,525 was requested on 8 June 2018 and received by UNEP on 28 June 2018, second disbursement of USD 924,951 was requested on 6 December 2019 and received by UNEP on 19 March 2020. A third disbursement of USD 1,084,248.04 was requested on 17 February 2022 and received by UNEP on 17June 2022. The project inception workshop was held on 26 and 27 February 2019. Total actual cumulative expenditures as of 30 June 2022 is 1,351,582.58

UNEP is the Delivery Partner and manages the grant. UNEP periodically transfers funds to the implementing partners upon completion of defined outputs and submission of quarterly financial statements as per the agreement between UNEP and the implementing partner. The implementing partner for this project the Department of Climate Change (DCC)

Key achievements during this reporting period (January – June 2022):

During the reporting period, the main project progress and achievements include: Organization of a high level sensitization workshops (Activity 1.1.5), on; (a) 28 January 2022 for policy makers (secretaries for provincial affairs) on climate change adaptation, (b) Mainstreaming climate change adaptation Sensitization workshop for Local Authorities Chief Executive Officers on the 16-17 of February 2022; In activity 1.2.4, three Training of Trainer' workshops were held on Climate Change Mainstreaming Manual- February, 9-11, 2022, March 9-11, 2022 and May 11-13, 2022; under activity 1.3.2, Validation of the Recommendations Report on Opportunities for Mainstreaming Climate Change in Development Planning was held on 15 February 2022; under activity 2.2.1, 2.2.2, 2.2.3, 3.1.1 and 3.1.2 the validation of the Prioritized Adaptation Options report and Consultative meetings on the Cost Benefit Analysis Model technical Meeting was held on 27 January 2022. under activity 3.2.2 stakeholder consultative Meetings for the development of the Adaptation Finance Strategy for Zimbabwe were also held (First meeting was held on 6 April 2022 and second meeting on 20 May 2022); capacity building and awareness raising initiatives were also carried out in sixteen districts of Matabeleland North, Mashonaland East and West provinces between January and June 2022(Matabeleland North 17-21 January 2022, Mashonaland East 7-11 February and 7-11 March 2022 and Mashonaland West 9-13 May 2022) targeting local leadership, vulnerable groups and communities on the need for mainstreaming climate change issues in their decision making processes (Activity 1.2.1 and 1.2.2); under activity 2.2.1; 2.2.2; 2.2.3 and 3.1.1 Quality Assurance meetings of the draft deliverables on prioritization, and Costing of Adaptation Options was held on 23-25 February 2022. finally, a stakeholder validation of the cost benefit analysis report was held on 21 June 2022 which paved way for the development of the Adaptation finance strategy for Zimbabwe which is currently being finalized.

Actual expenditure for this reporting period (January to June 2022 was USD 232,940.11. The budget for the next implementation period is US 571,300.

Planned activities for the next reporting period (July – December 2022):

During the next six months the project will focus on achieving the following outputs and activities within permissible COVID 19 restrictions at the time:

- Activity 1.1.5 Organize one training workshop for local authorities at the district level on the climate change
 mainstreaming agenda. The session will target key policy and decision makers who are critical game changers in mainstreaming climate change adaptation into development planning in line with the governments thrust
 on the climate change agenda to steer the country towards a low carbon development trajectory and to build
 resilience as the country devolves its political and administrative structures.
- Activity 1.2.1 participate at the Zimbabwe Agricultural show and provincial shows as way of raising awareness
 on climate change adaptation issues, dissemination of NAP readiness project publicity material and engaging
 stakeholders and members of the public on climate change adaptation and mainstreaming agenda
- Activity 1.2.1 Carry out seventeen awareness raising campaigns in three provinces namely- Harare, Manicaland and Bulawayo targeting subnational level planners at the District level including community representatives and traditional leadership aimed at changing behavioral outcomes necessary to build community resilience.
- Activity 1.2.2 Conduct the remaining seventeen capacity building workshops (back-to-back with activity 1.2.1) for vulnerable groups (women and Youth) on Climate change adaptation initiatives in seventeen districts of

Page 3 of 82 | June 2018 (ver. 14)

Harare, Manicaland and Bulawayo

- Activity 1.2.4. Conduct a (ToT) training of trainer's review workshop to assess the impact and effectiveness of the three trainings held during the reporting period.
- Activity 3.2.1 Finalize the chapter on new financial sources to address the adaptation needs
- Activity 3.2.2 Finalize the Development of the adaptation finance strategy to help in accessing new financial sources identified under Activity 3.2.1, review and strengthen the structure of existing funding institutions and support effective distribution of funds across sectors according to adaptation priorities identified.
- Activity 3.2.3 Finalize the climate finance tracking tool development
- Activity 4.1.1 finalize the monitoring and evaluation system for the National Adaptation Plan
- Activity 4.2.1 Develop training manuals for the monitoring and evaluation system for the NAP
- Activity 4.3.1 Finalize on the NAP document and carry out at least one sectorial consultative workshop for the development of the NAP.
- Activity 4.3.1 Roll out of NAP document across all provinces
- Activity 4.3.3 Finalize two documentaries on the NAP agenda
- Activity 4.3.3 Carry out a 12-part series radio programme on Climate change adaptation.

Challenges and lessons learnt:

The major challenges faced during the reporting period relates to Covid19. This has been circumvented by resorting to virtual working arrangements and holding hybrid meetings where applicable. With the increased uptake of Covid 19 vaccinations globally and in the country, that has seen the relaxation of Covid19 regulations resulting in project programming going back on track. In addition, Zimbabwe conducted its ten-year cycle population census during the reporting period, this affected the project programming as most of its stakeholders were attached to the national programme from its preparation to implementation during the first four months of the year. Within the no cost extension period the project will further enhance delivery by consolidating consultancies and where possible implement activities concurrently for the next reporting period.

SECTION 2: REPORTING ON COUNTRY READINESS LOGICAL FRAMEWORK²

This section requires an update on progress in implementing the planned Readiness activities. Any draft to the expected output should be submitted with progress report.

Progress is reported for the period (should be consistent with section 1.8)

From: 01/01/2022 to 30/06/2022

Outcome 1: Stakeholders capacity to formulate and implement the NAP process in Zimbabwe enhanced

Outcome narrative:

Capacity has been enhanced for key stakeholders of the various government Ministries, departments, agencies and local authorities to ensure they mainstream climate change considerations into their development planning and budgetary processes in the context of the government's devolution agenda in the country. As a result, the ministry of finance in their 2021 circular no 3, mandated ministry departments and agencies to forward budget proposal that reflect climate change considerations. In addition, climate change adaptation has been integrated into critical national development plans especially under the first National Development Strategy (NDS -1) which is the country's economic blue print for 2021-2025.

In this reporting period, the focus has been on building the capacity of Heads of Provincial Affairs otherwise known as Secretaries for Provincial Affairs and Devolution, policy makers and members of the National Adaptation Plan Working Groups on the need to effectively mainstream climate change in development planning process. Pursuant to advancing the climate change mainstreaming agenda at national and subnational level, NAP organized a capacity building and awareness raising programme on climate change mainstreaming issues along the lines of devolution targeting at the heads of provincial affairs and local authorities chief executive officers an (Activity 1.1.5). Another key milestone achieved is conducting the training of trainers using the Climate Change Mainstreaming manual. The trainings noted that the Manual is a good resource book for advancing the climate change mainstreaming agenda along the lines of devolution (Activity 1.2.4). Additionally, under the reporting period, district development plans were reviewed and the outputs thereof point towards the need to ensure climate change is integrated in standing subnational policies and plans (Activity 1.3.2)

gramme on climate change mainstreaming
was organized along the lines of government
devolution structures. Thiswas held immedi-
ately after the Climate Change Research
Mainstreaming Programme (Activity 3.3.1)
which sought to enhance the capacity of all
the provincial structures on mainstreaming
climate change issues in their medium to long
term economic development plans. The meet-
ing was held on the 28th of January 2022 and
was attended by over 25 people from the pro-
vincial offices across the country.
Further, a sixth capacity building and <u>aware-</u>
ness raising programme was held for a select
number of Local Authorities Chief Executive
Officers' on climate change mainstreaming in
their development plans to buildresilience for
a low carbon trajectory growth which was held
from 16 th to the 17 th of February 2022. The
event was was attended by 24 Local Authori-
ties CEOs and their officers of which 30%
were females.

	 ganization planning, the need for mainstreaming climate change in development planning and budgeting process at national and sub-national levels. Leveraging on private sector engagement is critical in order to identify their potential role in advancing the climate change mainstreaming agenda to ensure that no one is left behind whilst identifying investment options. To this end private sector Participants were also informed about their role in the implementation of the NDCs, updating of the NDCs and the LEDS as well as National Communications and Ozone Protection. These awareness programmes were critical realising the huge carbon footprint that these private sector giants such as <u>Hwange Colliery</u> who is at a risk of being left with stranded assets owing to global movements of coal and <u>Sable Chemicals</u>. Discussions ultimately pointed towards ensuring that climate change is effectively mainstreamed as Zimbabwe strives towards a low carbon and resilient trajectory. In an effort to raise awareness in the tourism sector on climate change related vagaries with various stakeholders from the sector. Tourism sector is now one of the sectors which contributes to emission and can also be affected by climate change in issues of energy, water among other factors. During the month of November and December 2020 seven (7) workshops/outreach programmes were held back to back with training of vulnerable groups (activity 1.2.2 below) including women and children in four districts namely: <u>Gutu</u>, (17 November 2020), <u>Masvingo</u>, (18 November 2020), <u>Chiredzi</u>, (9 December 2020), <u>Zaka</u>, (10 December 2020), <u>Chiredzi</u>, (9 December 2020), <u>Zaka</u>, (10 December 2020), <u>and Bikita</u>, (11 December 2020) A total of 417 people attended the workshop (66% were men, 34% were women whilst 15% represented youths). Compared to Mashonaland Central Districts, the number of women who attended the meetings was smaller at 34%. This in a way demonstrates the need for more capacity building in this	are actively engage in resil- ience building interventions. Another 10 workshops were held in the last 6 months. Climate change district engagement pro- grammes have created a good entry point for cli- mate change adaptation mainstreaming along the lines of devolved gov- ernment structures.

		relevant information from the training manual developed under Activity 1.2.3 to provincial and district level administrators', local authorities, the NAP working group members and CSOs.		The first one was held on 9-11 February 2022 and targeted Matabeleland region, The second one was held on 7-11 March 2022 targeting Midlands, Masvingo and Manicaland provinces and, the <u>third one</u> was held on 9-13 May 2022 targeted at Mashonaland provinces. The training was intended to build capacity at the subnational level in mainstreaming climate change in planning and budgetary processes in a consistent and coherent manner along the lines of devolution Of the 59 participants 26 were women. The figures show an increased participation of women in the climate space	also compounded by Covid19 impact and its associated lockdown restrictions	eventual effectiveness. In the absence of a sustainability plan with regards to identifying resources for the dissemination of the manual through trainings, the manual may not achieve its intended outcome after the project. The training was attended by over 59 participants drawn from the local government leadership at the provincial and district level	to assess the impact and effectiveness of the three trainings held during the reporting period status
1.3. National policies and sectoral develop- ment plans reviewed, and a periodic review process established.	many cross- sectoral and sectoral policies, strategies and plans in	1.3.1 Review the progress made to date, since the NAP process was initiated in September 2015, including a review of the Comprehensive Stocktaking Exercise for the National Adaptation Plan (NAP) undertaken by the GoZ.	Number of assessment reports.	Deliverable 1.3.1 Review report on the NAP process indicating gaps and opportunities for mainstreaming climate change was developed and subsequently reviewed and validated in September 2020 by stakeholders from various backgrounds critical in advancing the climate change mainstreaming agenda such as Parliament, Min of Finance, Agriculture, Meteorological Services Department and the Climate Change Management Department.	19- months delay from M12 to M31 to complete the activity due to longer than planned recruitment timelines which delayed the start of the review. Its completion is also delayed owing to Covid-19 impact	The report benefitted from inputs of the Project Steering committee meeting that oversee the implementation of the project. A total of 25 people attended the review and validation meeting (60% were men, 40% were women). Sectoral representatives identified gaps that may hinder NAP process that mainly related to limited capacity to mainstream climate change, poor network for systematic climate observation, data reliability issues, absence of a financial mechanism for adaptation as well as a framework for NAP monitoring and evaluation.	Activity completed

Page **18** of **82**

				These will be addressed partly through this project as well as other complimentary projects and national programmes	
1.3.2. Review 1 district development plans and recommend opportunities for: i) disaster risk management; and ii) the integration of climate change adaptation using the training manual developed under Activity 1.2.3.	- Recommendations report of each local development plan reviewed	Interim deliverable A draft report highlighting the opportunities for integrating climate change in disaster risk management was submitted on September 2020. Given that most Development plans are yet to take on board climate change considerations and the fact that climate change impacts are now real than ever there is urgent need to review the plans to ensure they speak to climate change and the whole aspect of building resilience and building back better. Progress in this reporting period. <u>Validation</u> of the <u>final recommendations</u> report on op- portunities for mainstreaming climate change in devel- opment planning was held on the 15 February 2022. The aim was to validate the report on Recommendations on Opportunities for Mainstreaming Climate Change in De- velopment Planning and enhanced understanding of climate change mainstreaming entry points in develop- ment planning.	owing to longer than planned recruitment timelines. The finalisation of the review has also delayed owing to the Covid-19 impact on travel and meetings.	The report provides useful recommendations that if completed provide points of sustaining the climate change mainstreaming agenda post the project. Stakeholders welcomed the report recommendations on the need to mainstream climate change in budgetary processes. The reviewed plans were yet to streamline climate change however since some time has lapsed since the review significant changes have been made to subnational economic plans which have been revised to align with the medium term development strategy as per the National Development	Completed

Outcome 2: Background information for formulating and implementing the NAP process managed, and adaptation options prioritized.

Outcome narrative:

During the reporting period the key outcome relates to the operationalisation of the climate change online portal. The portal serves as an information hub for synthesised climate information towards ultimately reducing vulnerability and mainstreaming climate change in development planning (Activity 2.1.3). Concerted efforts were also made towards contextualising a system to appraise and prioritise adaptation options to the Zimbabwean context. The system was subsequently used to prioritise a shopping basket of adaptation options to underpin the National Adaptation Plan (Activities 2.2.1; 2.2.2; 2.23.).

2.1.5 Develop regional vulnera- bility and risk assessments using the downscaled climate scenariosde- velopedunder 2.1.4 to inform pro- vincial- and district-level adaptation planning in the medium- and long- term.	1	Number of climate risk assessment reports.	Interim deliverable The draft Vulnerability assessment report covering the 10 Provinces was validated by stakeholders drawn from government arms, parastatals, academia, vulnerable groups and CSOs from the southern part of the country in December 2020. Milestones Radio and tv awareness programmes were aired to the general public on the findings of the downscaled climate scenarios report (Output 2.1.4) and the risk and vulnerability assessments report (output 2.1.5) on the need to adapt to climate change and extreme weather events. https://www.facebook.com/e xult.ncube/videos/35267129 87398391 https://www.facebook.com/w atch/live/?v=149735250047 0346&ref=watch permalink Validation of the draft Climate risk and Vulnerability assessment report on the Northern part of the country was held on <	The draft output received comments from UNEP which required that sensitivity variables be enhanced with more socio- economic factors at the microeconomics level whilst also demonstrating intersectoral dependence and synergies among issues. The assessment will help inform climate change mainstreaming into development planning at the level of the devolved government structures. 40 people attended the workshop of which 30% of them were women. A recommendation was made to ensure that the findings relating to Tsholotsho district which did not otherwise find it a high flood zone are consistent with findings from similar mapping done by	

Page **25** of **82**

			https://www.facebook.com/z bcnews/videos/9973067177 85493 Final deliverable 2.1.5 See attached		Zimbabwe National Water Authority (ZINWA). A sectoral approach instead of a systems approach was employed in the assessment as it is aligned to the NAP chapters and how are being defined. It resonates very well with the thrust employed in the revised Nationally Determined Contributions as it takes a sectoral approach	
2.1.6 Develop an operation and maintenance manual for the cli- mate database management sys- tem developed under Activity 2.1.2 and disseminate to relevant stake- holders.	1	Operations and maintenance manual for the climate database management system	Deliverable 2.1.6 An operational climate information portal and <u>user</u> <u>manual</u> was developed and validated in December 2020. The participants were drawn from ministry's various departments namely Meteorological Services Department, Climate Change Management Department, Information Communication and Technology Section and Finance & Administration. The portal is available in the link below http://www.climdat.cloud A total of 24 people attended the meeting (66% were men, 34% were women).	Covid19 related issues	The climate database management system and the user manual received positive feedback and benefitted from inputs by key departments in the ministry and PMU The five-day training workshop was a success as documented in performance evaluation carried out by participants. They requested continuous capacity development on the use of the software	Completed

2.1.7 Train staff from relevant de- partments within the MLAWCRR (including the Climate Change Management Department and Me- teorological Services Department) on: i) project management, includ- ing budgeting, accounting and fi- nancial reporting; ii) information and communications technology; iii) the use and calibration of cli- mate monitoring equipment and multiple climate data sources; iv) downscaling of climate change models; and v) the use of geo- graphical information systems and remote sensing in mapping exer- cises.	2	Number of training workshops	A five-day training workshop for Climsoft Plus database management system developed under 2.1.2 was held it sought to enhance users and administrators of the system with practical hands on feel of how to use and administer the system with a special focus on the new features. The users appreciated the training and requested that regular training be provided to help them master the system Deliverable 2.1.7 Three technical workshops were carried out using training materials developed by the national consultant on; 14 th -17 th January 2020 for project management, including budgeting, accounting and financial reporting 9 th – 13 th March 2020 - information and communications technology; 10 th - 14 th February 2020 geographical information systems and remote sensing In the 2020 period: two additional trainings were held as below; 21 st – 23 rd September 2020 The use and <u>Calibration of Climate Monitoring</u> Equipment and Multiple		The trainings also benefited from capacity needs assessments that was conducted by the local consultant	-

Interim Progress Report Template

			Zimbabwe steps up climate change mitigation efforts <u>https://www.chronicle.co.z</u> <u>w/zimbabwe-steps-up- climate-change- mitigation-efforts/</u> <u>https://www.chronicle.co.z</u> <u>w/calls-for-devolved- climate-adaptation/</u>		
2.2.3 Conduct an appraisal of adaptation options in all sectors at national and sub-national levels using the system developed in Ac- tivity 2.2.1 that identifies priority areas for interventions to build cli- mate resilience	1	Number of economic appraisals	During the reporting period, appraisal of adaptation options was done for key socio economic sectors underpinning the economy. (see output 2.2.2 above; the activities were merged and are implemented concurrently)	Prioritisation of adaptation options lays the groundwork for informing areas of interventions critical to reducing vulnerability.	

Outcome 3: NAP implementation resources identified and studies to inform medium- to long-term climate change adaptation investments conducted.

Outcome narrative:

Pursuant to enhancing the financial mechanism for adaptation planning in Zimbabwe, concerted efforts were made towards estimating the costs of climate change mainstreaming in development planning (Activity 3.1.1) This was complemented by the development of a cost benefit analysis model that will be used post grant facility to support the prioritisation of adaptation interventions at subnational level along the lines of devolution. Whereas the model as it was piloted in Chiredzi it was noted as data demanding it provides a good starting point in terms of sustaining the financial mechanism for adaptation post grant facility.

As the NAP Readiness cycle comes to an end concerted efforts have been made towards developing Zimbabwe's Adaptation Finance Strategy (Activity 3.2.2) to underpin the NAP. The key issue there is the role of private sector in supporting the NAP process. Specifically, the narrative within the draft strategy points towards the need to engage the private sector so that they may move away from the business as usual situation and actually climate proof their investments.

Additionally Zimbabwe has subsequently initiated climate change mainstreaming within the Ministry of Finance and Economic Development notably by developing a climate finance tracking tool (Activity 3.2.3) within the Development Projects Management Information System, which is a tool to be used for tracking financial flows. Hence developing the finance tracking tool within the tracking system will enhance Zimbabwe's climate tracking and fiduciary standards for meeting multilateral climate financing windows requirements.

Outputs	Baseline summary	Activities	Target s achiev ed	Indicators	Milestones and deliverables achieved⁵	Variance explanatio n	Qualitative assessment of activities undertaken	Planned activities and corresponding deliverables/mileston es for the next reporting period
3.1 Costs of climate change adaptation mainstreaming in Zimbabwe estimated		3.1.1 Undertake a study on adaptation costs of the economic sectors identified in the draft National Climate Policy and identify information gaps which may prevent a reliable estimation of climate change adaptation implementation costs in the medium- and long-term.	1	Number of gap analysis reports	Milestones Draft workplan/ Progress Report was presented in March 2020 on Gap analysis on the implementation costs of adaptation. A workshop was A workshop was held in 17-18 December 2020 to elaborate on the cost benefit analysis done for this activity (see activity 2.2. for details). It was noted that the Ministry of Finance needs to provide inputs to the process as they are key in raising co-financing resources for. Enhancing resources for. Enhancing resilience building interventions in the country A gap analysis report on the implementation costs of adaptation mainstreaming in critical sectors such as Agriculture and Water was made. It elaborates on the potential funding required for Zimbabwe to realise its adaptation goal	28 - months delayed from M18 to M46 due to longer than planned recruitment timelines for national and international consultants. Implementat ion has also been impacted by Covid19 pandemic	The draft report on estimates costs of climate change mainstreaming will benefit from the inputs of the International Consultants	Completed

Outcome 4: Monitoring, reviewing and reporting of the NAP process in Zimbabwe improved.

Outcome narrative:

A draft MR&R system for the NAP process has been produced. The draft system has broad based sectorial indicators that provide a good starting point for initiating climate change adaptation monitoring and evaluation. Additionally, the indicators developed will assist in mainstreaming climate change in the whole of government approach.

Outputs	Baseline summary	Activities	Targe ts achie ved	Indicators	Milestones and deliverables achieved ⁶	Variance explanation	Qualitative assessment of activities undertaken	Planned activities and corresponding deliverables/milestones for the next reporting period
4.1 A monitoring and reviewing system for the NAP process established.		4.1.1 Develop a monitoring, reviewing and reporting system for the NAP process in Zimbabwe including: i) milestones; ii) performance indicators at national and sub- national levels; iii) short, medium and long- term targets; iv) outputs and outcomes; v) monitoring and reviewing tools and templates; vi) assessment planning; and vii) follow-up actions.	1	Operational monitoring, reviewing and reporting system	were developed by the local consultant in February 2020. Milestones Two Consultative Workshops for defining the theory of	owing to longer than planned recruitment timelines and the impact of Covid19 pandemic	Whereas the draft system is in place, due to delayed progress on the component three outputs which are supposed to inform the system, the system may not be endorsed until those outputs are in place	Activity Harmonisation of the draft M and E system with Activity 2.2.3 Deliverable 4.1.1: Monitoring and Evaluation system for NAP

⁶ If possible, please provide hyperlinks to supporting documents.

	4.1.2 Institutionalize the monitoring, reviewing and reporting system for the NAP process by building on the current Results Based Management System identified in the National Monitoring and Evaluation Policy (2015).	1	Number of policy revisions.	that sets a framework for the enhanced	Variance of 28 months from M18 to M46 owing to the overall government policy on M&E that came into effect in 2020	No activities undertaken to be qualitatively assessed.	Activity will not be implemented as the government has in place a M&E Policy that was produced in 2020 that sets a framework for the enhanced monitoring and evaluation of Government programming including NAPs
4.2 In-depth training of national government representatives and stakeholders on the NAP monitoring and reviewing system conducted	 4.2.1 Design guidelines, tools and training manuals on the collection and analysis of data required for the monitoring, reviewing and reporting system developed under Activity 4.1.1. 4.2.2 Train technical staff of relevant 	1	Number of training manuals m Number of training	Intermediate deliverable A draft inception report was produced by the consultants in September 2019 and reviewed on December 2019 No progress in this reporting period Intermediate	27 months delayed from M24 to M51 due to longer than planned recruitment timelines and protracted restrictions associated with Covid19 21 months	the M and E system is yet to be adopted	Activity Prepare a training manual for MRR by August 2022 Deliverable 4.2.1: Training manual for monitoring, reviewing and reporting system This activity will begin once the
	government institutions and therevant government institutions and thematic lead ministries and departments – including inter alia the MLAWCRR, MoE, MoLG, and Ministry of Science and Technology (MoST) – on the monitoring, reviewing and reporting system using the guidelines, tools and training manuals created under Activity	•	manuals	deliverable Consultants contracted in August 2019 and have produced <u>draft</u> inception report in September 2019 and	delayed from M30 to M51 as this is dependent on output 4.2.1 above		M and E system has been developed and will be initiated in September 2022 Deliverable 4.2.2 training session on how to use

Page **43** of **82**

	4.2.1.			reviewed on December 2019 No further progress in this reporting period.			the NAP monitoring, reviewing and reporting system (training manual) and training reports
	4.2.3 Raise awareness of urban and rural communities, NGOs and CSOs on the monitoring, reviewing and reporting system using the guidelines, tools and training manuals created under Activity 4.2.1.	1	Number of training workshops -	Consultants contracted in August 2019 and have produced <u>draft</u> <u>inception report</u> in September 2019 and reviewed in December 2019 No progress in this reporting period	Variance of 22 months from M30 to M52 due to delayed completion deliverables under component two and three which feed into output 4.2.3	No activities undertaken to be assessed qualitatively during this reporting period	Activity Raise awareness of urban and rural communities, NGOs and CSOs on the monitoring, reviewing and reporting system by September 2022 Deliverable 4.3.2: local level workshops on NAP monitoring, reviewing and reporting system for the NAP
4.3 NAP document and communication material on NAP formulation, implementation, funding and monitoring developed and disseminated.	4.3.1 Analyse and document the lessons learned from the formulation, implementation, funding and monitoring of the NAP process in Zimbabwe.	1	NAP document, highlighting lessons learned	A three day brainstorming session was held to discuss ways of sustaining the Climate change mainstreaming agenda as the project nears completion.	variance from M30 to M54 due to delayed recruitment of IC supporting component	Pending outputs from component one, two and three have delayed the finalization of this activity	Activity Submit the NAP to UNEP and NAP central for review Deliverable 4.3.1 NAP document, highlighting lessons learned
	4.3.2 Publish the findings generated under Activity 4.3.1 on ministerial websites, the climate change information portal developed under Activity 2.1.2 and other relevant platforms and networks, including NAP GSPs and the UNFCCC.	1	Number of information productions publicly available	No progress in this reporting period	14 months variance from M 36 to M50 due to delays in recruiting national consultant	No activities undertaken to be assessed qualitatively during this reporting period	Activity Design publicity documents on the NAP Deliverable: NAP report uploaded to knowledge sharing platforms by November 2022
	4.3.3 Produce and disseminate short documentaries clips and radio programmes on the implementation of the NAP process in Zimbabwe.	1	Number of information productions publicly available	A <u>documentary on</u> <u>Zimbabwe's climate</u> <u>change vulnerability</u> was produced on 20 Dec 2020	14 months variance from M36 to M54 due to delayed completion of	The documentary benefitted from inputs and quality assurance by PMU	Activity Finalise the filming of the adaptation documentary by July 2022

Readiness and Preparatory Support

Interim Progress Report Template

Page **46** of **82**

	Body for Scientific and Technological Advice (SBSTA) was held in Bonn, Ger- many, from the 1 st to the 16 th of June 2022. The meeting encouraged devel- oping countries to cautiously handle the issues of private sector engagement as this may place a caveat for future access to multilat- eral climate financ- ing windows. The meeting was part of the preparations for	
	eral climate financ- ing windows. The	
	the preparations for the COP 27, which is scheduled to take	
	place in November 2022 in Egypt.	

SECTION 3: ACTUAL IMPLEMENTATION TIMETABLE

Please provide the timeline of the Readiness Support activities and deliverables described in the outcomes in the Gantt chart below according to the actual progress of the activities and month(s) in which the deliverable was completed. Please ensure the outcomes/outputs/activities match those highlighted in Section 3.

Progress is reported for the period (should be consistent with section 1.8)

From: 01/01/2022 to 30/06/2022

1.1. NAP co- ordination and governance structures strengthened, and stake- holders' ca- pacity built	1.1.1. Establish a permanent NAP Coordina- tion Office at the Ministry of Lands, Agricul- ture, Water, Climate and Rural Reset- tlement (MLAWCRR), including func- tions and struc- tures (i.e. a steering com- mittee, NAP technical team and coordina- tion body) to operationalise the NAP pro- cess and en- sure long-term climate change adaptation mainstreaming. Deliverable																																																				
	1.1.1.: Opera- tional NAP Coordination Office																																																				
	1.1.2 Define and communi- cate the NAP process roadmap – including the NAP communi-																																																				

⁷ The Grant effectiveness date is 11 May 2018. The implementation timetable starts in June 2018, which is when the first disbursement was received. June 2018 is therefore M1 of the Project.

SECTION 4: BUDGET & EXPENDITURE REPORTING

This section requires the applicant to report on the proposed budget. Double-click the table below to edit the spreadsheet.

Progress is reported for the period on activities (should be consistent with section 1.8 and 1.10). Please fill the budget reporting in the	From: 01/01/2022 to 30/06/2022
excel format table below by double clicking the table. The currency used should be consistent with Grant Agreement.	

Budget excel is separately provided.

SECTION 5: PROCUREMENT PLAN FOR THE NEXT IMPLEMENTATION PERIOD

List the items planned to be procured during the next implementation period (including consultants) and explain what procedures will be used for these procurements (e.g. direct procurement, open tender, other). Double-click the table below to edit the spreadsheet.

Item to procure	Unit Number or Work month/day	Lump sum or Unit rate	Total Budget	Procurement procedures
	i	ii	iii = (i x ii)	used
Component 1	·		· · ·	
				Competitive
National Consultants - Policy Experts -,1.1.5, 1.2.1,1.2.2,1.2.4	217	300	60,000	recruitment
Sub-Total component 1	·		60,000	

⁸ As per signed agreement.

⁹ Please provide details information of commitment and accrual including vendor/payee name, amount and payment due date.

¹⁰ Please provide justification for variance, excess of 10% of the amount originally allocated for a Category shall only be done with the Fund's prior written approval.

SECTION 6: CHALLENGES, LESSONS LEARNED AND WAY FORWARD

Please describe what were the challenges encountered during the current reporting period; what were the solutions to mitigate them; and what were the key lessons learned and what will the project do to undertake course corrections during the next reporting period.

Challenges and lessons learnt:

The major challenge faced resonates around the after effect of Covid19 pandemic as it relates to project programming. This was worsened by the fact that 2022 is the year that the ten-year census was being held. This entailed erratic availability of targeted stakeholders at subnational level thereby delaying engagements. Other challenges observed during the reporting period relate to the fact that the preparations and carrying out of the national census programme was scheduled for May 2022. This entailed that several consultations and engagements had to be put on hold to pave way for the national programme.

Way forward and mitigation measures:

To finish activity programming by 30 November 2022 the Project will hold some activities back to back were possible and ensure that all consultancies activities are expedited.

An no cost extension for the project was granted on 10 December 2021 which will allow for the smooth completion of the grant support. In addition, measures that were put by the Government following the Omicron variant have managed to curtail the spread of the virus.

SPECIAL ADDENDUM: COVID-19 RELATED IMPACTS

This section provides information on temporary measures to support project implementation through the extension period. Please be advised that the measures do not constitute a permanent change in policy. If you have any questions, please feel free to send an inquiry to <u>opm@gcfund.org</u>.

GCF has granted up to six-months extension of the grant term/anticipated duration of readiness activities for specific grants that had been approved by the GCF prior to the pandemic having arisen and which expire after 1 March 2020 and are effective prior to 8 April 2020. GCF has granted additional flexibilities with guidelines as outlined below.

No-Cost Extension

- i. All grants will be automatically extended by six months. However, please be informed that the willingness on the part of the GCF to provide this six-month extension on the basis of the COVID-19 pandemic is not intended to prevent RPSP activities from being delivered under the pre-pandemic existing contractual timelines. Delivery partners and National Designated Authorities/Focal Points (NDA/FP) can complete the grant implementation sooner than the full no-cost extension period. Therefore, the GCF expects that delivery partners will fully coordinate with NDA/FPs in relation to the application of the said extension as a result of the COVID-19 pandemic.
- ii. Delivery partners should include a revised workplan for the new period in the next reporting cycle.
- iii. Grants requiring an extension longer than the six-months must submit well justified requests in line with standard practices and procedures for the GCF's consideration and approval.
- iv. The originally agreed grant sum required to complete the activities under the respective legal agreements remains unchanged for grants accepting the no-cost extension.

Project management costs: The project management costs (PMC) cap has been increased from 7.5 percent to 12.5 percent of the total activity budget approved. Partners can tap into the approved contingency fund to meet these additional costs up to the 12.5% cap. If the delivery partner increases the PMC, then the delivery partner is required to provide detailed documentation and justification supporting the increase in PMC and clearly outlining how the additional costs are related to the COVID-19 pandemic. This justification should be included in the interim progress report or completion reports due for submission as detailed in the grant agreement.

Contingency budget: The approved contingency amount included in the budgets for these activities may be used to cover unforeseen costs relating the COVID-19 pandemic without prior approval from GCF. The contingency budget may be used for project management costs (PMC). The said contingency expenses will need to be justified and included in the detailed reports that are required to be submitted by the delivery partner/recipient under the respective legal agreement between the delivery partner/recipient and the GCF.

Budget Re-allocation: The reallocation of approved budget among the budget line items can be made from one budget category to another up to 25 percent variation across the categories. The receiver and giver budget category can only take or give without prior fund approval up to 25 percent based on the previously approved budget. Budget can also be reallocated from outputs without changing the project scope to PMC if the contingency budget is insufficient to meet the increases in PMC. The delivery partner is required to provide detailed documentation and justification supporting the budget reallocation in the submitted reports in line with the grant agreement.

No change deliverable	in	30/04/2021	30/11/2022	Yes, reallocated funds from IC budget line 2.1.7 and workshop 4.1.2 budget line

In-country Status (Please provide an update of the status of the country due to COVID-19 pandemic.)	During the reporting period the Government has been consistent in ensuring that Covid19 spread is curtailed through the issuance of restrictive measures in hot spot areas where applicable. According to Zimbabwe's ministry of health and childcare, as at 20 June 2022, there has been 254,919 confirmed cases of Covid-19 in Zimbabwe with cumulative deaths of 5,536 people. COVID-19 infections are decreasing, with 93 new infections reported on average each day.
	Vaccinations campaigns by the government are ongoing. As at 20 June 2022, Government administered over 11,882,414 doses. Assuming every person needs 2 doses, that's enough to have vaccinated about 40.6% of the country's population. The Government has embarked on the COVID-19 vaccination blitz, targeting those aged 12 years and above, especially school children and those leaving in hard to reach areas as well as the elderly. It demonstrates effective mainstreaming of the virus in national planning and administration.
JustificationforRequestsandImplications(Please(Pleaseprovidedetails of the changes	During the reporting period several activities requiring face to face interactions and consultations with stakeholders that were put on hold had to start implementation in line with the Governments Covid 19 protocols. Restrictions on physical gatherings and meetings were lifted allowing to hold large gatherings.
